TECHNOLOGY AT WORK FOR YOU

Connecting your business to the technology resources you need.

Information is being exchanged all around the globe at incredible rates. Without the right technology in place for your business, it's easy to become overwhelmed. Let the experts at VoDaVi put your mind at ease and manage your technology by providing an efficient and sound infrastructure for your organization. Our professionals are ready to assist at a moments notice, utilizing our expertise to offer a comprehensive suite of technology solutions.

Our professional engineers work extensively with Voice, Voice over Internet Protocol (VoIP), Data Networking, Wireless and Security Applications, including Legacy Voice Applications. With our ability to design, implement, support and manage a Network or Voice Solution, VoDaVi Technologies is the right partner for your business. Knowing organizations can't afford down time or loss of employee productivity, our team of experts are in the foreground, and background, to assure that your operations are running smoothly.

FLEXIBLE SOLUTIONS FOR YOUR BUSINESS NEEDS

Technology consulting provides a complete end to end solution.

VoDaVi Technologies offers comprehensive business solutions to cover all of your Network and Telecommunications needs. We understand each business environment is unique and should be given the personal attention it deserves. For years, our team has been involved in providing best in class solutions to clients of all sizes, including multiple municipalities, school systems and corporations with an international presence. VoDaVi has what it takes and offers the quality service and solutions you have been searching for.

MANAGED SERVICES

With the world's reliance on Information Technology today, it is too risky to operate in a reactive environment. Be Proactive with your IT Investment with outsourced IT Management Responsibilities and Functions. VoDaVi Technologies offers Managed Services solutions allowing your business to gain predictable and lower IT costs, increased employee productivity, and customer satisfaction.

IT MANAGEMENT AND REMOTE MONITORING

With a Managed Services solution the health and performance of your IT assets and infrastructure are monitored day to day, every day. Empower your staff with a stable IT environment; allowing them to focus on the daily operations of your business. With VoDaVi Technologies as your Managed Services Provider we will concentrate on your IT maintenance and monitoring, providing you and your staff with a stable environment to keep your business producing and your employees performing.

VMonitor, VoDaVi Technologies specialized Remote Management & Monitoring software, alerts our team when a problem arises on your system. The issue is diagnosed and a solution is provided before your staff is aware a problem even exists. With VMonitor in place, IT problems are detected and resolved faster. It is our responsibility to provide you with stable communications to run your business as well as seamless solutions for all of your technology needs.

Managed Services Benefits

1. REDUCE RISK TO YOUR DATA AND IT ASSETS
2. CONCENTRATE YOUR EFFORTS ON YOUR CORE BUSINESS ACTIVITIES
3. EXPERIENCE WORRY-FREE BUSINESS COMPUTING
4. CONTROL IT COSTS
5. GET THE MOST OUT OF YOUR IT INVESTMENTS

VODAVI TECHNOLOGIES IS AN AUTHORIZED TECHNOLOGY PARTNER FOR CISCO TELEPRESENCE VIDEO EXPRESS.

Cisco TelePresence® and Video collaboration solutions provide life-like, high-definition, conferencing facilities with superior audio and video, allowing participants to meet their colleagues, clients and business partners across a virtual table. Participants can enjoy a same-room meeting experience, even if they are located in different locations around the world. With an increase in remote offices and home offices, participants enjoy more productive meeting sessions, improve business interactions while improving project management and forming tighter integration with team members, business partners and clients. Reduce the cost and time involved with business travel and continue to have face to face meetings with Cisco TelePresence®. Video collaboration and Cisco TelePresence® personalize and enhance communication among participants.
